

THE COMFORTage COMMUNITY FORUM (CCF)

WHAT IS THE COMFORTage COMMUNITY FORUM?

The CCF is a dynamic collaborative network designed to engage partners, pilots, and expert external stakeholders with a shared interest in dementia, cognitive decline, frailty, and digital health technologies.

COMFORTage (**Prediction, Monitoring and Personalized Recommendations for Prevention and Relief of Dementia and Frailty**) is a Horizon Europe project promoting solutions for frailty and dementia.

MAIN OBJECTIVE OF THE CCF

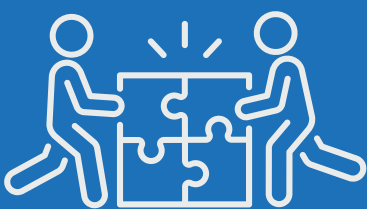

To enhance the sustainability and broader uptake of the project's results by offering opportunities to learn, understand, and continue the project's impact beyond its conclusion.

SPECIFIC OBJECTIVES OF THE CCF

Facilitate Access to Innovation: Provide stakeholders with access to current advancements in the field.

Enhance Regional Understanding: Deepen understanding of local business conditions to better align the project with regional needs.

Ensure Long-term Continuity: Collaborate with existing organisations to establish sustainable mechanisms that ensure the forum's continuity.

PURPOSE OF THE CCF

The CCF serves as a crucial collaborative space where stakeholders, experts, and community members can exchange knowledge, address challenges and drive significant advancements in elder care and mental health support.

THEMATIC AREAS OF THE CCF

The thematic areas provide a structured and purposeful framework to drive innovation, improve outcomes, and ultimately enhance the quality of life for those affected by dementia and frailty.

- **Dementia and Frailty Service Delivery Models for affected patients and their carers**

This area focuses on supporting people with dementia and frailty, as well as their caregivers. The main goal is to extend autonomy and improve the quality of life for those impacted.

- **Skills to facilitate the Service Delivery Models**

This thematic area highlights the importance of enabling factors for the successful implementation of service delivery models, including building digital skills, providing training, and offering essential support and resources.

- **AI-based Prevention of Cognitive Decline**

This theme focuses on strategies, tools, and technologies aimed at preventing cognitive decline in individuals at risk of dementia, with a particular emphasis on integrating Artificial Intelligence (AI), Virtual Assistive and Ambient Assisted Living (AAL) solutions.

IMPACT AND CONTINUITY

The CCF not only supports the immediate goals of COMFORTage project but also ensures its long-term impact on improving dementia and frailty care.

A collaborative effort to transform care and support the elderly, ensuring a lasting impact beyond the life of the project.
